

Year 12 Careers Programme

Year 12 Careers lessons are mostly concerned with options available after the HSC. This may include university entry, traineeships, apprenticeships, GAP year (taking a year out before moving into tertiary education) or employment. Students also look at study timetables and how to increase their chances for success in the HSC.

Students in Year 12 visit the Maitland Careers Market, held in May each year. The market provides an excellent opportunity for students to discover relevant information regarding post school options concerning universities, colleges, TAFE's, Defence Force careers, employment, apprenticeships and traineeships.

In Term 3, students attend a University field trip where they visit the University of Wollongong, University of Sydney, and University of Newcastle. It is a very valuable excursion which provides them with the opportunity to experience university life and ask any questions they may have.
